

The List of Wetlands of International Importance

13 February 2013

The Ramsar List was established in response to Article 2.1 of the Convention on Wetlands (Ramsar, Iran, 1971), which reads: “Each Contracting Party shall designate suitable wetlands within its territory for inclusion in a List of Wetlands of International Importance, hereinafter referred to as “the List” which is maintained by the bureau [secretariat of the Convention] established under Article 8.”

Wetlands included in the List acquire a new status at the national level and are recognized by the international community as being of significant value not only for the country, or the countries, in which they are located, but for humanity as a whole.

The Convention establishes that “wetlands should be selected for the List on account of their international significance in terms of ecology, botany, zoology, limnology or hydrology.” Over the years, the Conference of the Contracting Parties has adopted more specific criteria interpreting the Convention text, as well as an *Information Sheet on Ramsar Wetlands* and a *Classification system of wetland type*.

All issues pertaining to the Ramsar List were encapsulated in Resolution VII.11 adopted by the Conference of the Parties in May 1999 and entitled ***Strategic Framework and guidelines for the future development of the List of Wetlands of International Importance***¹, which has been frequently updated.

Everything in the Strategic Framework is founded upon this “Vision for the Ramsar List”: “To develop and maintain an international network of wetlands which are important for the conservation of global biological diversity and for sustaining human life through the ecological and hydrological functions they perform.”

Full data submitted by the Parties for each of their Ramsar Sites are entered in the Ramsar Sites Database, which is maintained by Wetlands International under contract with the Convention and searchable from the Ramsar Sites Information Service (<http://ramsar.wetlands.org>). The basic Ramsar List is also available, with one-paragraph descriptions of each site, as the ***Annotated Ramsar List*** on the Convention’s website (www.ramsar.org/anno-list).

Coordinates:

Geographical coordinates provided in this List are merely notional “centre points” for quick reference and are not intended to be legal specifications; for Sites with complex shapes or multiple parts, the centre points may not even lie within the Sites’ boundaries. For detailed information on Ramsar Site boundaries, consult the Ramsar Information Sheets submitted by the Parties (Ramsar Sites Information Service).

Abbreviations:

MR: Sites included in the **Montreux Record**, “a record of Ramsar Sites where changes in ecological character have occurred, are occurring or are likely to occur” maintained by the Secretariat in consultation with the Contracting Party concerned (Recommendation 4.8). www.ramsar.org/montreux-record

TRS: **Transboundary Ramsar Site**, where “an ecologically coherent wetland extends across national borders and the Ramsar Site authorities on both or all sides of the border have formally agreed to collaborate in its management, and have notified the Secretariat of this intent” (*Ramsar Manual*). www.ramsar.org/trs.

¹ The current Strategic Framework is available in print form as No. 17 in the Ramsar Handbooks series on the Ramsar website at www.ramsar.org/pdf/lib/hbk4-17.pdf

La Liste des zones humides d'importance internationale

La Liste de Ramsar a été établie conformément à l'article 2.1 de la Convention sur les zones humides (Ramsar, Iran, 1971) qui stipule: "Chaque Partie contractante devra désigner les zones humides appropriées de son territoire à inclure dans la Liste des zones humides d'importance internationale, appelée ci-après, «la Liste», et qui est tenue par le Bureau institué en vertu de l'article 8."

Les zones humides qui sont inscrites sur la Liste acquièrent un nouveau statut au niveau national et, aux yeux de la communauté internationale, prennent une importance non seulement pour le pays ou les pays où elles se trouvent mais aussi pour toute l'humanité.

La Convention précise: «Le choix des zones humides à inscrire sur la Liste devrait être fondé sur leur importance internationale au point de vue écologique, botanique, zoologique, limnologique ou hydrologique ». Au fil des années, la Conférence des Parties contractantes a adopté des critères plus spécifiques pour interpréter le texte de la Convention, de même qu'une *Fiche descriptive des zones humides Ramsar* et un *Système de classification des types de zones humides*.

La Résolution VII.7, adoptée par la Conférence des Parties en mai 1999, et intitulée ***Cadre stratégique et lignes directrices pour orienter l'évolution de la Liste des zones humides d'importance internationale***² contient tout ce qui concerne la Liste de Ramsar.

Le Cadre stratégique repose intégralement sur cette «Vision pour la Liste de Ramsar»: "Élaborer et maintenir un réseau international de zones humides importantes, en raison des fonctions écologiques et hydrologiques qu'elles remplissent, pour la conservation de la diversité biologique mondiale et la pérennité de la vie humaine."

Toutes les données soumises par les Parties sur chacun de leurs Sites Ramsar sont saisies dans la Banque de données des Sites Ramsar. Celle-ci est tenue par Wetlands International sous contrat de la Convention et peut être interrogée depuis le Service d'information sur les Sites Ramsar (<http://ramsar.wetlands.org>). Sur le site web de la Convention sont également disponibles la Liste de Ramsar de base, comprenant un paragraphe de description sur chaque site, et la Liste de Ramsar annotée (www.ramsar.org/anno-list).

Coordonnées :

Les coordonnées géographiques figurant dans cette Liste sont avant tout des « points centraux », fournis à des fins de référence rapide, et en aucun cas des indications ayant force juridique ; il se peut même, dans le cas de sites aux formes complexes ou composés de plusieurs parties, que les points centraux se trouvent en dehors des limites des sites. Pour des informations précises sur les limites des Sites Ramsar, veuillez consulter les Fiches descriptives Ramsar soumises par les Parties (Service d'information sur les Sites Ramsar).

Abréviations:

MR: Sites inclus dans le **Registre de Montreux**, «un registre des Sites Ramsar dont les caractéristiques écologiques ont connu, connaissent ou sont susceptibles de connaître des modifications», tenu par le Secrétariat en consultation avec la Partie contractante concernée (Recommandation 4.8).
www.ramsar.org/registre-montreux

TRS: Sites Ramsar transfrontières: "des zones humides écologiquement cohérentes s'étendent de part et d'autre de frontières et les autorités responsables de ces Sites, des deux côtés de la frontière, décident, dans le cadre d'accords officiels, de collaborer à la gestion et notifient le Secrétariat de leur intention" (*Manuel de Ramsar*). www.ramsar.org/trs

² Le Cadre stratégique est disponible sous forme imprimée dans le No 17 des Manuels Ramsar et peut être téléchargé sur le site Web de Ramsar: www.ramsar.org/pdf/lib/hbk4-17fr.pdf.

La Lista de Humedales de Importancia Internacional

La Lista de Ramsar se estableció con arreglo al párrafo 1 del artículo 2 de la Convención sobre los Humedales (Ramsar, Irán, 1971), que dice lo siguiente: “Cada Parte Contratante designará humedales idóneos de su territorio para ser incluidos en la Lista de Humedales de Importancia Internacional, en adelante llamada “la Lista”, que mantiene la Oficina [secretaría de la Convención] establecida en virtud del Artículo 8.”

Los humedales incluidos en la Lista pasan a formar parte de una nueva categoría en el plano nacional y la comunidad internacional reconoce que tienen un valor significativo no sólo para el o los países donde se encuentran, sino también para la toda la humanidad.

La Convención estipula que “la selección de los humedales que se incluyan en la Lista deberá basarse en su importancia internacional en términos ecológicos, botánicos, zoológicos, limnológicos o hidrológicos.” Con los años la Conferencia de las Partes Contratantes ha adoptado criterios más precisos para interpretar el texto de la Convención, así como una *Ficha Informativa de los Humedales de Ramsar* y un *Sistema de Clasificación de tipos de humedales*.

Todas las cuestiones relacionadas con la Lista de Ramsar se encapsularon en la Resolución VII.11 adoptada por la Conferencia de las Partes en mayo de 1999, titulada **Marco estratégico y lineamientos para el desarrollo de la Lista de Humedales de Importancia Internacional**.³

El contenido íntegro del Marco Estratégico descansa en la siguiente “Visión para la Lista de Ramsar”: “Crear y mantener una red internacional de humedales que revistan importancia para la diversidad biológica mundial y para el sustento de la vida humana debido a las funciones ecológicas e hidrológicas que desempeñan.”

Los datos completos presentados por las Partes para cada uno de sus Sitios Ramsar se incluyen en la Base de Datos sobre los Sitios Ramsar, de cuyo mantenimiento se encarga Wetlands International en virtud de un contrato con la Convención, y se pueden buscar desde el Servicio de Información sobre Sitios Ramsar (<http://ramsar.wetlands.org>). En el sitio web de la Convención (www.ramsar.org/anno-list) también se puede consultar la Lista básica de Ramsar, que contiene una descripción de un párrafo de cada sitio, y que figura como la **Lista anotada de Ramsar**.

Coordenadas:

Las coordenadas geográficas que se proporcionan en la Lista son “puntos centrales” meramente hipotéticos para tener una referencia rápida de su ubicación y no pretenden ser especificaciones con carácter jurídico; en los Sitios con configuraciones complejas o compuestos de muchas partes, puede que los puntos centrales ni siquiera estén situados dentro de sus límites. Para obtener información detallada sobre los límites de los Sitios Ramsar, consulte las Fichas Informativas de Ramsar presentadas por las Partes (Servicio de Información sobre Sitios Ramsar).

Abreviaciones:

MR: sitios incluidos en el **Registro de Montreux**, “un Registro de los Sitios Ramsar en los que se hubieran producido, se estuvieran produciendo o pudieran producirse modificaciones en las condiciones ecológicas” que lleva la Secretaría en consulta con cada una de las Partes Contratantes interesadas (Recomendación 4.8). www.ramsar.org/registro-montreux

TRS: Sitios Ramsar transfronterizos: “un humedal ecológicamente cohesivo se extiende a través de fronteras nacionales y las autoridades del sitio Ramsar de ambos o todos los lados de la frontera han acordado oficialmente colaborar en su manejo, y han notificado a la Secretaría tal decisión” (*Manual de Ramsar*). www.ramsar.org/trs

³ El Marco Estratégico está disponible en versión impresa como No. 17 de la serie Manuales Ramsar y en la página Web de Ramsar en: www.ramsar.org/pdf/lib/hbk4-17sp.pdf.
