IRONKEY™ WORKSPACE

IronKey Workspace with Windows To Go, a PC on a Stick™, equips employees and contractors with a portable Windows 8.1 corporate image. This Microsoft-certified solution comes complete with applications, security controls and access policies all stored on a ruggedized, fully manageable USB flash drive, with savings as high as 90% compared to the cost of laptops. IronKey's Windows To Go solutions let IT centrally control access and secure data, supporting remote wipe or remote kill in case of loss or theft. Users enjoy superior performance by booting off the Windows To Go drive, rather than their host computer's hard drive thus isolating their personal and corporate workspaces, making it an ideal solution for mobile workers, teleworkers and contractors, and "Bring Your Own Device" (BYOD).

With Imation, you can rely on our Windows To Go devices built around our expertise in portable workspace solutions, so you can keep your mobile workforce productive no matter where their work takes them. All IronKey Workspace drives are Microsoft-certified and deliver up to five times the minimum average read/write performance requirements for Windows To Go devices.
